

SpagKing

Restaurant Technology & Management Platform

Customer Experience • Operations • Intelligence

Prepared by Falcon Developer

Monday, 10 August 2026

One platform connecting every part of SpagKing

From the customer's first craving to the CEO's morning dashboard — SpagKing unifies ordering, kitchen operations, inventory, staff, delivery, and business intelligence into a single, connected ecosystem. No more scattered tools. No more blind spots. Just one platform, built for the way SpagKing runs.

The Problem

What the platform solves

SIX PAIN POINTS

01

Fragmented Ordering

Customers use WhatsApp, phone calls, and walk-ins with no unified system.

02

Manual Operations

Cashiers write tickets by hand. No digital record of orders or payments.

03

Inventory Blindness

No real-time stock visibility. Stockouts and waste happen silently.

04

Staff Management

Attendance, shifts, and payroll tracked on paper. No performance visibility.

05

Delivery Chaos

No rider tracking, no zone management, no delivery performance data.

06

Limited Intelligence

Management makes decisions without real-time data or branch comparison.

THE SOLUTION

One connected SpagKing ecosystem

Every module talks to every other module. When a customer orders, the kitchen sees it instantly. When stock runs low, the manager gets an alert. When a delivery completes, the CEO's dashboard updates in real-time. SpagKing becomes a single, intelligent operation — not a collection of disconnected tools.

BROWSE. ORDER. TRACK. ENJOY.

Browse. Order. Track. Enjoy.

The Customer Journey

From craving to reorder

7 STEPS

From first craving to one-tap reorder

POS Terminal

Professional cashier dashboard

8 CAPABILITIES

0

Walk-in Orders

Fast product grid with barcode scan

0%

Discounts

Apply percentage or fixed discounts

0%

Refunds

Process refunds with reason tracking

0%

Receipts

Print or digital receipts

0%

Shift Open/Close

Opening balance + reconciliation

0%

Cash Reconciliation

Expected vs counted cash

0%

Split Bills

2, 3, or 4-way bill splitting

0%

Kitchen Tickets

Send orders to kitchen display.

Inventory Management

Real-time stock visibility and control

8 CONTROLS

0

Stock Receiving

Log incoming stock deliveries

0

Daily Stock Count

Daily reconciliation sheets

0

Low-Stock Alerts

Automatic reorder threshold alerts

0

Supplier Management

Ratings, orders, outstanding balances

0

Purchase Orders

Create and track POs

0

Waste Logging

Track waste by item and reason

0

Expiry Tracking

Expiring items with discount/donate actions

0

Stock Transfers

Transfer stock between branches.

Staff & HR Management

Complete workforce management

Attendance

Track daily attendance per staff

Clock In / Out

Digital clock-in with timestamps

Shift Planning

Weekly shift grid
(Morning/Evening/Night)

Leave Requests

Approve or reject leave with tracking

Performance Reviews

Monthly performance metrics per employee

Training Records

Course tracking with completion rates

Disciplinary Records

Incident logging with severity and actions.

DELIVERY

Delivery Management

Riders, zones, fees and live tracking — fully controlled

■ Rider Assignment

Assign orders to available riders

■ Live GPS Map

Real-time rider location tracking

■ Delivery Zones

6 zones with fees and ETAs

■ Delivery Fees

Configurable per zone

■ Rider Performance

Completed deliveries, ratings, earnings.

CRM & Loyalty

Know your customers. Keep them coming back.

Customer Profiles

Full timeline, order history, loyalty tier

Feedback

Reviews with reply, resolve, escalate

Loyalty Program

4 tiers: Bronze, Silver, Gold, King VIP

WhatsApp Campaigns

Send offers via WhatsApp Business

Email Campaigns

Track opens, clicks, conversions

SMS Campaigns

Bulk SMS with delivery reports.

Reports & Business Intelligence

Daily, weekly, and monthly insights

Daily

- Sales trend
- Orders volume
- Food cost %
- Waste %
- Labour cost
- Complaints breakdown
- Manager's daily report

Weekly

- Branch ranking
- Staff ranking
- Best-selling meals
- Slow-moving items

Monthly

- Profit & Loss
- Inventory variance
- Customer growth
- Staff performance

From raw numbers to confident decisions.

0

Reduced Leakage

Cash reconciliation, no blind spots

0

Staff Visibility

Attendance, performance, shift tracking

0

Faster Decisions

Real-time dashboards for management

0

Centralized Intelligence

All branches in one platform

WHY SPAGKING

Built for SpagKing's growth.

SpagKing started in Lokoja as the No 1 Food Brand. Now expanding across Lagos — Lekki, Maroko, Surulere. This platform is built specifically for that journey: from a single flagship to a multi-branch restaurant chain. Every feature, every workflow, every dashboard is designed around the way SpagKing operates — bold flavours, fast service, and a different experience with food.

A Different Experience With Food.

Live Demo Agenda

What we'll show you today

▶ 10 demo steps

1	Landing Page Public SpagKing brand experience		6	Inventory Stock, suppliers, waste	
2	Customer Order Browse menu, customize meal		7	Staff & HR Attendance, shifts, disciplinary	
3	Checkout & Payment Delivery, Paystack, order placement		8	Reports Daily, weekly, monthly analytics	
4	Live Tracking 7-step animated order timeline		9	CRM Customer profiles, campaigns	
5	POS Terminal Walk-in order to receipt		10	Executive Dashboard CEO command center	

▶ 10 steps · ~30 minutes · Live walkthrough of every module

**One platform. Every order.
Every branch. Every decision.**
